

SFARHST – Student Class/Grade History Summary

The SFARHST screen is a running list of a Murray State University's student's class registration. This form also includes midterm and final grades submitted by the instructor. NOTE: Grades on this form never change. If an instructor has changed a grade for the listed student, the change will not reflect on this form.

To get started, enter the student's M# in the ID field. If the student's M# is not known, click the '...' to query.

Click GO after the student's name has been populated into the field.

Depending on the student's number of semesters attended, the shown list will need to be expanded by either changing the Per Page number OR clicking the 'right arrow' to show the next page. Both are found at the bottom left of the page.
